

HLZ Reporting Server

Description

The HLZ reporting server is a software tool for conversion of the generated HLZ data into insight and knowledge of the daily operation and performance of the counting/redemption centre.

Benefits

- Easy control and revision of the actual countings.
- Improved insight and understanding of your business.
- Improved alignment and achievement of best practices.
- No installation or maintenance of client software.
- Low start-up costs.

Features

- Web-based interface.
- Automatic/scheduled collection of counting data.
- Reports defined from date range, batches etc.

Requirements

- Windows 2003 server hosting and MSSQL server standard or MSSQL server express.
- LAN connectivity between the HLZ PC and the UBC Management server.
