Anker Andersen Quarterly

Supporting the next major Deposit Return Market

MARKET UPDATE: One of the highlights of the quarter was our participation at RWM Expo 2026 in Birmingham, where Anker Andersen exhibited together with our parent company, RVM Systems.

The exhibition brought together customers, partners and stakeholders from across the waste and recycling industry and confirmed the strong momentum building around the upcoming Deposit Return Scheme in England, Scotland and Northern Ireland.

With the system scheduled to launch in October 2027, preparations are already well underway. Together with RVM Systems, we look forward to supporting customers and partners as one of Europe's largest upcoming deposit return markets takes shape. Thank you to everyone who visited our stand. We truly appreciate the many valuable conversations and look forward to continuing the dialogue.

Building our organisation for the future

COMPANY UPDATE: As part of our continued organisational development, we are pleased to welcome five new colleagues to Anker Andersen. Capabilities that are essential as we continue to grow and support complex international customer projects. Please welcome (from the left) Klaus W. Matthiessen, Project Manager, Lasse Therp Hansen, Head of Service, Lena Aavild, Head of Procurement, Line Aagaard, Head of PMO & Strategy Execution and Katrine Dahlhus Jessen, Master Data Specialist.
A warm welcome to all our new colleagues.

More than a logo

BEHIND THE BRAND: Every company has a story, and sometimes it is reflected in the smallest details. The Anker Andersen logo has been part of our identity for more than twenty years.
Inspired by a gear wheel, it symbolises our engineering heritage, precision and commitment to continuous development.
In 2021, the green dot became part of our visual identity as a symbol of sustainability and our contribution to "*A clean planet where every container counts*".
It is a small detail, but one that reflects who we are and where we are heading.

A letter from our CEO

Technology alone does not create successful deposit return systems. It takes skilled people, strong processes and close collaboration to turn innovation into reliable operations.

As Anker Andersen continues to grow, we are strengthening our organisation across key business functions, with a particular focus on building a more robust and streamlined Project Management Office (PMO).

These investments enable us to deliver increasingly complex international projects while maintaining the quality and reliability our customers expect.

By investing in people and capabilities today, we are building the foundation for tomorrow.

Thank you for your continued trust and partnership.

Kind regards,
Anker Andersen A/S

Helle Borup Friberg
CEO
