

Anker Andersen Newsletter – April 2025

Recycling Pfand Österreich

The launch of the deposit return system in Austria has been successful from the very start!

Week by week, more plastic bottles and metal cans with the deposit symbol are appearing on the shelves, and consumers are embracing the deposit system very positively. From 1st January to 16th March 2025, more than 12 million bottles and cans have already been returned!

Anker Andersen has played a key role in this process by delivering HLZ® high-speed counting and sorting systems to the central counting centers nationwide. The advanced HLZ® systems efficiently count and sort the returned cans and PET bottles, ensuring that the material can be properly processed and reused, supporting sustainable recycling efforts.

High-Speed Counting and Sorting System with integrated Crushers

We are pleased to announce the successful delivery of an innovative HLZ® high-speed counting and sorting system featuring a double crusher arrangement to Returpack AB in Sweden. This cutting-edge solution is designed to optimize efficiency in the recycling process while ensuring security and sustainability.

Equipped with two ultra-compact industrial flatteners for PET and cans, the system crushes materials immediately upon sorting. This feature significantly enhances storage optimization and reduces transportation costs. The high-capacity crushers also play a crucial role in preventing fraud, ensuring that collected materials are properly processed and accounted for.

This new stand-alone system represents a major step forward in advancing recycling technologies, reinforcing Returpack's commitment to sustainability and operational excellence. We are proud to contribute to this initiative and look forward to continued collaboration in driving innovation in the industry.

For further information, please watch [this video](#) of the system in operation or contact our Sales team.

Certificate for Social Responsibility

We are proud to share that we have been awarded a Certificate for Social Responsibility by Hedensted Municipality. This recognition reflects our commitment to taking social responsibility seriously and contributing to the workforce of the future.

The certificate is awarded to companies that lead by example and inspire responsibility in areas such as supporting individuals on the margins of the labor market, guiding young people toward education and employment, engaging with the local community, supporting our own employees, and investing in the workforce of tomorrow.

We are honored by this acknowledgment, which highlights how our targeted efforts have successfully included individuals from the fringes of the labor market. In addition, it demonstrates how social responsibility can be transformed into tangible actions that create value for both the company and society.
